

More than a TV stand, this handsome rack incorporates a home theatre system for enjoying multi-channel surround sound from digital sources.

Durable and Sophisticated Design

- Handsome design with glass top will look elegant in any interior
- Ideal for large-size LCD or PDP TVs
- No need for numerous speakers and cables

True Surround Sound

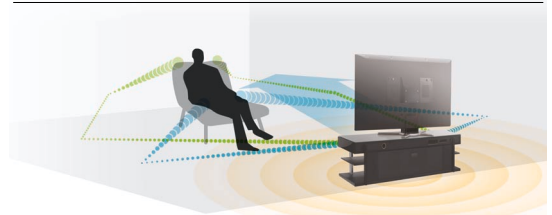

- Sensational multi-channel sound from DVDs, digital broadcasting, satellite broadcasting and other digital sources
- Digital amplifier built-in: 112W total power [62W (beam drivers) + 50W (subwoofer)]
- Built-in Yamaha Advanced YST II subwoofer with down-firing active design and Linear Port
- Large range of optimum listening positions thanks to a wider soundstage

Advanced Features

- 1080p-compatible HDMI (2 in/1 out) including 1080p/24Hz repeat
- IntelliBeam automated system calibration with Direct Start
- Wide variety of beam modes: 5 Beam, 3 Beam, 3 Beam + Stereo, 2ch Stereo and My Surround
- Panasonic VIERA Link compatibility

Main Specifications

System Frequency Response	
35 Hz-20 kHz	
Digital Amplifier	112 W total power: 62 W (2 W x 16 beam drivers + 15 W x 2 woofer) + 50 W subwoofer
Input Sensitivity/Impedance	1 Vrms/32 k-ohms (analog input)
Maximum Input Signal	2.2 Vrms (analogue input, 1 kHz, 0.5% THD)
Total Harmonic Distortion	0.1% (beam drivers/woofers) 0.2% (subwoofer)
Drivers	16 x 2.8cm beam drivers, dual 8cm woofers and 13cm subwoofer
Input Terminals	2 HDMI, 2 optical, 1 coaxial and 2 analog
Weight-Bearing Capacity	Top Board 50 kg
	Shelf 15 kg
	Bottom Board 30 kg
Standby Power Consumption	0.1 W (HDMI control off)
Dimensions (W x H x D)	1,160 x 500 x 415 mm
Weight	43 kg

All channels have independent orientations. Sound is beamed off the walls to create the effect of a multi-speaker surround system.

Surround Sound TV Stand YRS-1000

NEW PRODUCT BULLETIN

DURABLE AND SOPHISTICATED DESIGN

Elegant Design

With the surround sound unit housed in the top section, supported by two aluminium columns, the YRS-1000 achieves an elegant and open design having plenty of space for your other components. The top surface is 5mm thick reinforced glass, which combines a beautiful appearance with superior durability. The YRS-1000 also eliminates the problem of where to put your subwoofer – this powerful unit is "hidden" away inside.

TRUE SURROUND SOUND

True Multi-Channel Surround Sound from a Single Unit

Without any extra speakers, the YRS-1000 provides true multi-channel sound that surrounds listeners from all directions. Yamaha's acoustic and DSP expertise allowed the development of technology that uses reflected sound waves to create amazingly lifelike sound. DVD movies and other digital sources sound just the way they are supposed to and even 2-channel sources like TV can be heard in dynamic surround sound.

Digital Amplifier Built-In

The YRS-1000 includes a powerful and efficient digital amplifier. It powers the beam drivers (16W x 2 + 15W x 2 woofer) and the subwoofer (50W), for a total output of 112W. There is no need to purchase an additional amplifier or subwoofer, so the system is compact and economical.

Extensive Connection

The YRS-1000 connection panel offers HDMI (2 inputs/1 output) interface, 2 optical/1 coaxial digital and 2 analogue inputs, video out for on-screen display, and subwoofer output.

Advanced YST II for Awesome Deep Bass (Subwoofer)

Yamaha's patented Advanced Active Servo Technology (Advanced YST II) generates incredible bass from small speaker enclosures. This system's advanced negative impedance converters intelligently adjust the negative impedance generation as the driver moves, creating a hard, rigid cone that prevents deep resonant waves from leaking out of the speaker cone. This means the full power of the waves is forced out through the air port, resulting in clear, powerful bass.

The YRS-1000 subwoofer employs a high performance, down-firing active design. Even though compact, it delivers impressive bass power and accurate sound reproduction. The down-firing design radiates the sound efficiently in all directions.

The Linear Port provides smooth bass response and minimises extraneous noise. It also serves to boost the sound output from this compact subwoofer.

ADVANCED FEATURES

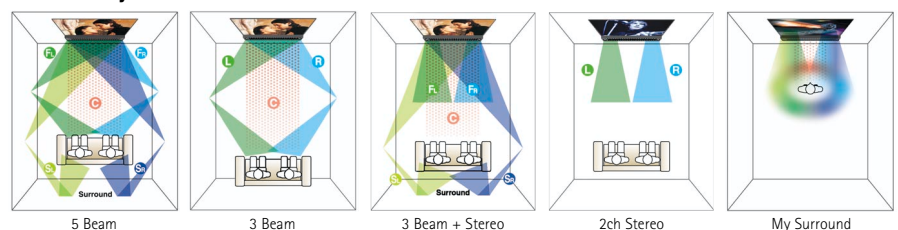

1080p-Compatible HDMI (2 In/1 Out)

The YRS-1000 provides dual HDMI inputs and one output, with support for 1080p resolution. You can connect two HDMI sources, such as a DVD player and a high-definition set-top box and enjoy the highest possible video quality when using a 1080p monitor. It is also capable of repeating 1080p/24Hz signals from HDMI input to output, maintaining the high image quality from Blu-ray Disc players.

IntelliBeam Automated System Calibration

This Yamaha exclusive feature ensures optimum multi-channel sound reproduction with accurate image location. By monitoring and analysing the

Wide Variety of Beam Modes

sound with the microphone included with the YRS-1000, IntelliBeam automatically sets the best beam angles, while optimising the level and frequency response of each beam. It also offers Direct Start function via remote unit. This makes initial setup both extremely simple and acoustically perfect.

Panasonic VIERA Link Compatibility

When the YRS-1000 is connected to a Panasonic VIERA Link TV via HDMI, operating your entire system becomes much more convenient. To watch a Blu-ray Disc, for example, you just press "Play" on the VIERA remote control. The YRS-1000 turns on and selects the correct source input, the TV turns on and sets the correct channel for disc play, and the Blu-ray Disc player turns on and begins to play. Instead of three remotes, you just use one remote and press one button.

Other Notable Features

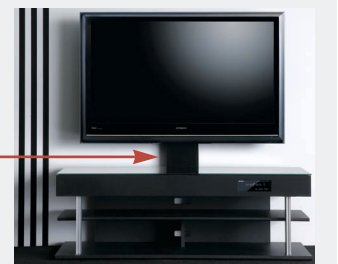

- Night Listening Enhancer and TV Equal Volume
- Turn On Volume: Volume comes on at a preset level when power is turned on
- Dolby Digital, DTS, Dolby Pro Logic II and DTS Neo:6 compatibility
- Three System Memories
- Parameter settings can be made manually
- Maximum Volume: for avoiding sudden loud sounds by children
- Memory Save Lock
- Front panel lock and extend IR code
- Versatile preset remote unit

Versatile preset remote unit

Optional Mounting Bracket – YTS-V1100

The YTS-V1100 Mounting Bracket attaches to the YRS-1000 and the wall, letting you firmly mount even large-size TVs flat against the wall. Height can be adjusted in three 10cm steps.

The YTS-V1100 bracket can support up to 47", 45kg TVs. The YTS-V1100 is not available in some areas.
